Having decided to change to a morning market, the Eyemouth Harbour Trust needed a new Cold Room at the present Fishmarket to permit the landing of fish for a 24 hour period or more prior to the Market.

Of all the firms contacted, ACE Ltd. were the most attentive and helpful during the planning stages. The erection was duly completed precisely to programme and the company even made special arrangements to accommodate the needs of the famous Eyemouth Seafood festival, the floor of the unit serving as an audience area for one of the outdoor music venues, half way through the construction period.

The ability this family firm have shown in responding to the needs of the Eyemouth fishermen and fishmerchants has been impressive. Their interest, expertise, commitment to quality and the likeable, straightforward way they approach their business have all combined to ensure a trouble free construction process and a highly successful result.

We would have no hesitation in recommending them for similar projects elsewhere.
