

Key Project

Galloway Seafoods factory in Newton Stewart specialises in producing breaded scampi and other breaded products, mainly for the UK market. A major £4m expansion project was completed in summer 2010, allowing the company to substantially increase both production capacity and their product range.

Design

The design team at Ace Refrigeration worked closely with Galloway Seafoods to ensure the completed project met their business needs now and for the future.

Standards

The 7,569m³ Freezer Room had to be kept to -24° so reliability and efficient back up systems were crucial. The value of stock held at any one time is worth hundreds of thousands of pounds so ACE Refrigeration designed a system to ensure the integrity of the produce at all times.

Ace Refrigeration also created a 100m³ temperature controlled loading bay.

Close Control

Both systems were fitted with state of the art temperature monitoring and recoding systems to allow for close control in real time so any deviation can be acted upon speedily.

What the Customer has to say...

Michael Murphy, Production Director at ScoFro, said: "ACE Refrigeration worked very closely with us on the build of our freezer rooms and refrigerated loading bay at our Newton Stewart factory, ensuring our business needs were at the forefront of the design. We found them very knowledgeable, experienced and reliable and they delivered the project on time and within budget. I would have no hesitation in recommending them for other similar projects."

ACE Expertise

Established in Glasgow in 1951, our knowledge, breadth of experience and professional indemnity set us apart from others and enable us to have a very flexible approach to projects and working partnerships. We are manufacturer independent so are able to offer customers solutions which best meet their needs and we have experience working on all major manufacturers in the refrigeration and air conditioning equipment market. While we specialise in the design, installation, service and maintenance of commercial/light industrial refrigeration and air conditioning systems predominantly across Scotland and Northern England, we have also ventured as far as Chad, Gabon, Kazakhstan, Egypt, the Falkland Islands and France.
