

11th June 2013

ACE Refrigeration has been our service and maintenance partners for some 10 years and we have always found them to be extremely reliable and always willing to go the extra mile to attend to our needs.

So when we needed to refurbish and upgrade our main kitchen and banqueting facility we knew who we could trust to deliver the job on time and within budget.

ACE Refrigeration provided us with two freezer rooms and a number of chilled preparation areas including the specialist banquet production area, one blast freezer and nine walk in chilled rooms.

The existing equipment was also running on the soon to be obsolete R22 gas so ACE proposed a staged replacement using compressor packs to run the existing chill and freezer rooms more efficiently until the full refurbishment took place.

We were extremely happy with the installation work carried out by ACE Refrigeration and continue to be impressed with the first class service they provide to us as service and maintenance partners.

Yours faithfully

Geoff Bates
Chief Engineer
