

To Whom It May Concern,

ACE Refrigeration worked closely with us on the design and installation of refrigeration plant as part of the refurbishment and upgrade of our existing fish processing factory in Buckie.

With particular emphasis on energy efficiency, we found ACE to be extremely knowledgeable and highly professional in all of our dealings with them. They delivered the project on time and within budget.

Refrigeration is crucial to our business so we need a refrigeration partner we can trust, ensuring our business needs are being met now and for the future.

I would have no hesitation in recommending ACE Refrigeration for other similar, large projects in the food processing industry and looking forward to working with them again in the future.

Yours sincerely,

Victor West

Managing Director, Associated Seafoods
