To whom it may concern

Re - Ace Refrigeration

Having successfully tendered for the supply and installation of four new compressor packs for the ice making system in the processing plant Fort William, we would like to thank the team at ACE Refrigeration for all their hard work with this project that was completed on time and within budget.

ACE Refrigeration have also carried out all our monthly pre-planned maintenance and reactive service, on our ice making and air-conditioning equipment, for the last two years and we have always found their level of service to be first class.

We would have no hesitation in recommending ACE Refrigeration as a reliable and experienced company with the ability to deal with all aspects of refrigeration and air conditioning design, installation and maintenance.

We look forward to continuing our partnership with ACE Refrigeration in the future.

Kind Regards,

Iain Johnston  
Purchasing Manager
