## Glasgow firm shares in Scottish Food Success!

A Glasgow family firm has completed another energy efficiency project with one of the UK's largest egg producers.

ACE Refrigeration secured the deal with Glenrath Farms who produce and pack more than 1.4million eggs each day at their production facility in Peebles.

Food processing experts ACE Refrigeration were tasked with the installation of two systems inside a new Chill Room within their new liquid egg facility, as well as replacing equipment in a small Chill Room in the main factory.

As an additional element ACE Refrigeration also assisted Sanovo, who manufactured and supplied the liquid egg process machinery, with the ice bank.

The refrigeration and cold room specialists at ACE were previously responsible for the design and installation of the refrigeration element of a recent extension as well as replacing the cooling in the existing packing station.

Glenrath Farms is run by the Campbell family who have farmed the Tweeddale Hills in the Scottish Borders for three generations, with the business growing from producing and selling eggs door to door to supplying eggs to supermarkets throughout the UK.

Last year ACE also replaced the R22 gas air conditioning in the grading area at Glenrath Farms, a vital part of the process as Glenrath offer Fresh, Barn, Free Range and Organic eggs.

ACE Refrigeration are manufacturer independent and work with customers to offer bespoke refrigeration solutions and complete turnkey packages which best meet their needs, with particular emphasis on increased energy efficiency and reduced operating costs.

In recent years the team at ACE has become the leading refrigeration partner to many top food processing companies with expertise in the fish and seafood industry, fruit and vegetable sectors, bakeries, dairy, eggs, poultry and meat as well as food distribution, wholesale and logistics companies.

ACE has carried out indemnified design and installation projects for cold rooms and freezer rooms, ice generators, chilled production facilities, Hydro Coolers, water chillers, spiral freezers, blast chillers and blast freezers.

All ACE refrigeration plant also incorporates temperature monitoring systems, which are both HACCP accredited, BRC compliant and conform to Food Safety and Inspection Service standards.

Clients in the food processing industry also include 2Sisters Food Group, Albert Bartlett Potatoes, AP Jess, Associated Seafoods, Braehead SFO, Castle MacLellan, Drysdale's, First Milk and Marine Harvest.

John Campbell, Chairman of Glenrath Farms, said: "This is the second installation ACE has provided for us, the first one is running smoothly and working well, hence the reason for securing the order for our processing plant. We anticipate this huge investment by a diversified hill farming family business will prove to be a worthy investment to our fast growing company. Glenrath are now by far the largest egg producing and marketing company in Scotland, with accounts in Asda, Sainsbury and Tesco."

Shane McKenzie, Sales Director of ACE Refrigeration, said: "This project reinforces our position as one of the leading refrigeration experts for the food industry throughout the UK.

"We are always pleased to support Glenrath Farms meet their business needs now and safeguard them for future growth."
