ACE REFRIGERATION

This is the second installation you have provided for us, our latest development, a £6M investment in a new processing plant by a diversified hill farming family business, which will prove to be a worthy investment to our fast growing company.

ACE Refrigeration carried out the first installation in our state of the art £7M modern grading and packing facility, which is running smoothly and working well, hence the reason for securing the order for our processing plant.

Glenrath are now by far the largest egg producing and marketing company in Scotland, with accounts in Asda, Sainsbury and Tesco.

John P Campbell OBE
Chairman
